

IDEAS

NAME: RHEA DEVASIA
DATE: 16/10/24
SHEET: 1
TOPIC: AUSTRALIAN DEMOGRAPHICS

FILTER

- Charts ③ & ⑤ & ⑥ essentially show the same information but in different formats. Only one of them needs to be used

CATEGORISE

- Trends → ①
- Geographic Distribution → ② & ⑥
- Understanding Growth Factors → ④
- Age/Gender Distribution → ⑦
- Diversity of Origins → ③ & ⑤ & ⑧

COMBINE & REFINE

- The Sankey Diagrams in ⑤ & ⑥ could be combined.

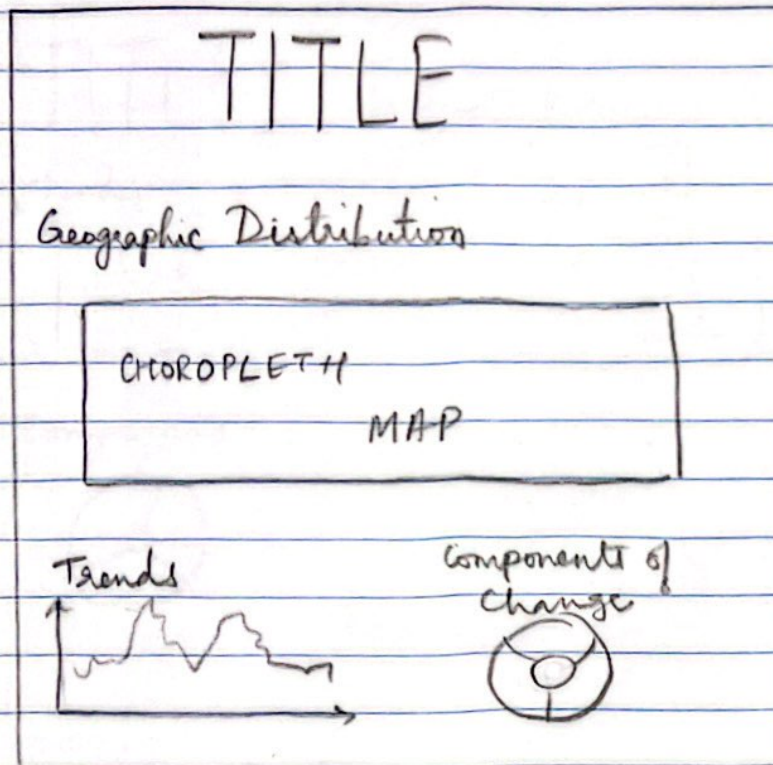

QUESTIONS

- How has Australia's total Population changed from 2000 to 2023?
- What years saw the most growth/decline?
- How does population density vary across the states?
- What are the main reasons for change?
- What is the age & gender distribution?
- How diverse is Australia's Population?

LAYOUT

NAME : RHEA DEVASIA
DATE : 16/10/24
SHEET : 2
TITLE : STORYTELLING

OPERATIONS

- Users can hover over or click on different states in the map to view detailed data or to filter info in the other sections
- Users can view tooltips by hovering

FOCUS

- The main purpose is to provide a multi-faceted overview of 'Australian Demographics'
- The layout combines these components on a single page, using a sequential flow to guide user through the story.
- The choropleth map is the main focus of this visualisation & provides an intuitive geographical representation of population density across Australia.

DISCUSSION

PROS

- a comprehensive view that combines various aspects & provides all the info on one page

CONS

- multiple charts on a single page may cause users to be overwhelmed
- multiple charts can lead to space constraints

LAYOUT

NAME : RHEA DEVASIA
DATE : 16/10/24
SHEET : 3
TITLE : DASHBOARD

OPERATIONS

- Users can hover over or click on different states of the map to view detailed data or to filter info in the other sections
- Users can view tooltips by hovering
- Users can use the sliders to observe changes over time.

FOCUS

- The main purpose of this visualisation is to provide a comprehensive overview of Australian Demographics
- The layout is designed to facilitate a detailed comparison across multiple dimensions of data
- The Sankey Diagram and the choropleth map are the main focuses of this visualisation.

DISCUSSION

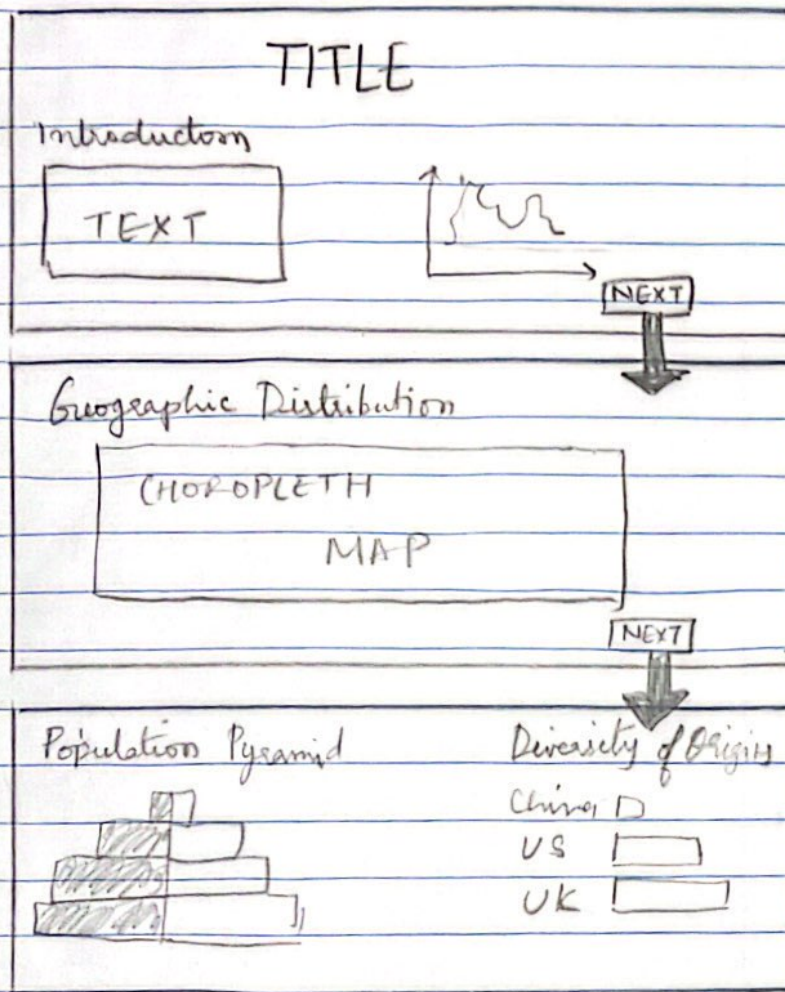

PROS

- provides a broad view of data from high level to specific impacts
- allows users to compare various aspects of data effectively

CONS

- might result in a visually cluttered display

LAYOUT

NAME : RHEA DEVASIA
DATE : 16/10/24
SHEET : 4
TITLE : NARRATIVE STORYBOARD

OPERATIONS

- Users can move through the story & navigate through the pages by clicking on 'NEXT' button in the bottom of the page.
- Users can view the tooltips by hovering

FOCUS

- The layout guides the user through a narrative through a series of visualisations that build on each other.
- There is no one chart that is the main focus since each page in the storyboard is a distinct visualisation.

DISCUSSION

PROS

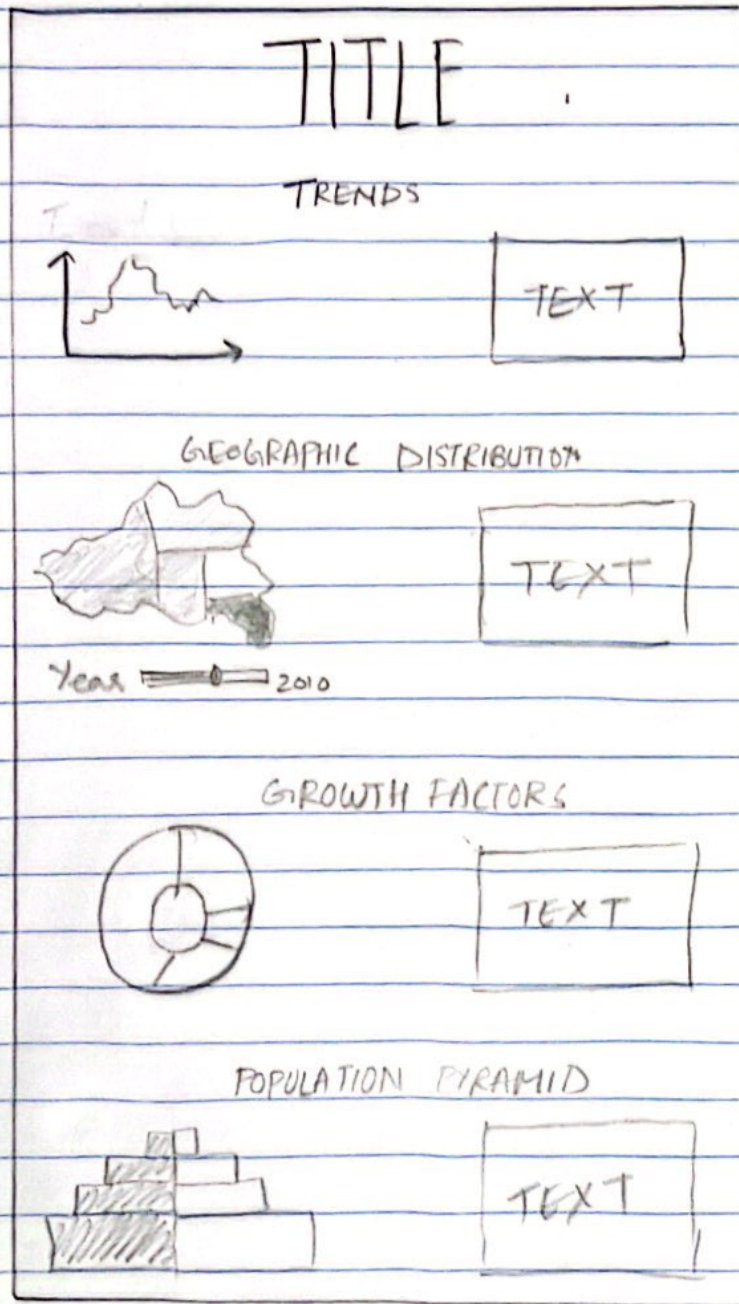

- highly engaging & easy to follow
- each section is distinct, ∴ reducing cognitive load

CONS

- users have little control over the flow
- users are unable to simultaneously compare different charts at the same time.

LAYOUT

NAME : RHEA DEVASIH
DATE : 16/10/24
SHEET : 5
TITLE : FINAL DESIGN

OPERATIONS

- Users can view the tooltips by hovering
- Users can use the sliders to observe changes over time for the choropleth map

DETAILS

- Datasets sourced from: Australian Bureau of Statistics
- Build using Vega-Lite
- Estimated Time to Build 2 Weeks

FOCUS

- the text next to each chart should contain information about the chart & should explain it to the users
- this layout displays the important aspects of Australian Demographics in a single page using a sequential flow to guide users through the narrative.
